Awesome-Kubernetes

A curated list for awesome kubernetes sources Inspired by [@sindresorhus' awesome](#)

"Talent wins games, but teamwork and intelligence wins championships."

-- Michael Jordan

Without the help from these [amazing contributors](#), building this awesome-repo would never has been possible. Thank You very much guys !!

Thanks to Gitbook.This awesome list can now be downloaded and read in the form of a book.Check it out --> <https://www.gitbook.com/book/ramitsurana/awesome-kubernetes/> .Keep Learning Keep Sharing !!

If you see a package or project here that is no longer maintained or is not a good fit, please submit a pull request to improve this file. Thank you!

If you are interested in becoming a maintainer for the awesome kubernetes list. Please drop me a mail at ramitsurana@gmail.com with your name and github id.Thanks

What is Kubernetes? :ship:

Kubernetes is an open source orchestration system for Docker containers. It handles scheduling onto nodes in a compute cluster and actively manages workloads to ensure that their state matches the users declared intentions. Using the concepts of "labels" and "pods", it groups the containers which make up an application into logical units for easy management and discovery.

Source: [What is Kubernetes](#)

History:

Kubernetes is known to be a descendant of Google's system BORG

The first unified container-management system developed at Google was the system we internally call Borg. It was built to manage both long-running services and batch jobs, which had previously been handled by two separate systems: Babysitter and the Global Work Queue. The latter's architecture strongly influenced Borg, but was focused on batch jobs; both predated Linux control groups.

Source: [Kubernetes Past](#)

Date of Birth:

Kubernetes celebrates its birthday every year on 21st July. The project was born in the year 2015.

Roadmap

The awesome-kubernetes will now soon be available in the form of different releases and package bundles, It means that you can download the awesome kubernetes release up to a certain period of time, The release for awesome kubernetes 2015 bundle is released. Checkout the releases column for more info. Stay tuned for more updates.
